Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Acknowledgment is made in the receipt of the information disclosure statement and priority papers filed July 22, 2005 and the oath filed February 22, 2006.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 1 recites the limitation "the parting plane" in line 4. There is insufficient antecedent basis for this limitation in the claim.
5. Claim 1 recites the limitation "the winding pitch" in 7. There is insufficient antecedent basis for this limitation in the claim.
6. Claim 4 recites the limitation "the wall" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3,084,926 to Lemelson.

Art Unit: 3683

Re-claim 1, Lemelson discloses a screw compression spring, characterized in that sections of the windings that are adjacent the parting plane have a lesser incline than a winding pitch, see figure 2 noting the flat sections of the screw compression spring. Furthermore, the screw compression spring is injection molded, even though this limitation cannot be relied upon for patentability since a product-by-process claim can only rely upon structural limitations for patentability.

Re-claims 2 and 3, the incline is slight or essentially zero, note the flatness of the incline.

Re-claim 4, the flat region steps up into an incline.

9. Claims 1-4 rejected under 35 U.S.C. 102(b) as being anticipated by JP 2002-013569 to Omura.

Re-claims 1-4, see figure 4 and abstract, the screw compression spring has sections of the windings adjacent the parting plane that are essentially flat.

10. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by US 14,287 to Knudsen.

Re-claims 1-4, Knudsen discloses a screw compression spring with essentially flat regions of the windings, see figure 1.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Raspet, Trame et al., Piepenstock and Loc et al. are all believed to anticipate at least claim 1.
